

Passier Dynamic Leather Saddle Girth: For exceptional freedom of movement!

The new Dynamic Leather Saddle Girth: the intelligent saddle girth for optimum freedom of movement! Horses will love it!

Intelligent strap buckle arrangement: The elastic strap buckles at the front allow the horse optimum and free movement of the shoulder. The fixed strap buckles at the back keep the saddle in place. The buckles should always be in the same position on both sides.

Attention: On horses with an unfavorable girth-area, the saddle girth can also be attached with the fixed strap buckles at the front, which keep the saddle where it belongs. The elastic strap at the back minimizes the forward motion of the saddle.

Two D-rings: Auxiliary reins, martingale or breastplate can easily be attached to the practical D-rings in the center of the saddle girth.

Finest quality leather: The saddle girth is made from extra-soft and horse-friendly Passier Leather.

Many choices: The Dynamic Leather Saddle Girth is available in lengths of 115 to 145 cm (45" to 57") and the colors Black and Havana.

The new Dynamic Leather Saddle Girth is available from selected Passier stockists. You can easily find Passier dealerships in your area with the Store-Locator at passier.com.
